## Freestanding Retail Barriers

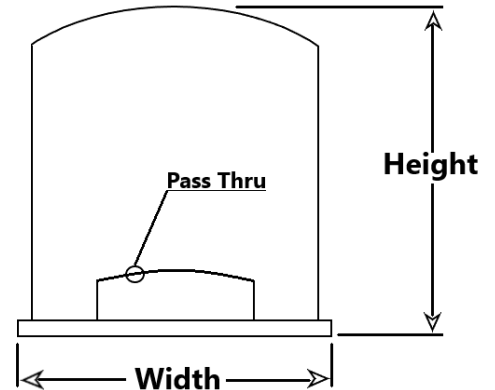

The Miller Plastic Covid-19 Retail Barriers have been designed to be a freestanding solution to protect your clientele and employees. They are less intrusive than most other offerings. Our frameless design with crystal clear Poly-Carbonate that makes it hard to tell its even there. We offer these barriers in multiple different sizes. The base is made from 1" thick textured Poly-Ethylene. This gives our barrier the proper weight to stand on its own and be stable. Also available in white and simulated brushed bronze. No assembly needed. The window just snaps into the base without any need of a fastener. Doesn't require being fastened to your counter but comes with double sided tape if needed.

### Base color options

- Optically clear poly-carbonate
  - Frameless Design
  - Impact resistant
- Does not impair vision
- 1 Minute to assemble - Snaps together
  - Pass Thru Money Slot
  - Tip resistant

## COVID - 19 Face Shields

Our face shields are comfortable and effective. We use an optically clear plastic that is twice as thick as other units that are described as "one time use." The foam forehead pillows are made from an impenetrable high density polyurethane foam that breathes and is very soft. The shield fog resistant and scratch resistant during normal working conditions. Made right here in the USA. Durable and dependable to be used for long periods of use. There is plenty of space for eye glasses and a secondary mouth/nose mask. These are latex free, and provide adequate eye, nose, and mouth coverage.

Quantity >	10 Pack	50 Pack	100 Pack	500 Pack
